Career Summary

Jan 2022 - Present

Queensland State Clinic, Queensland, AU
Community Support Worker

Outline

Provide assistance, support, and advocacy to individuals who require help with daily living, social integration, and community participation, for an independent community facility that delivers medical care, social services, and outreach programs to 20K+ residents.

Key Responsibilities

- Aid people in activities of daily living, such as personal hygiene, dressing, eating, and mobility, while offering emotional support and enhance self-esteem and independence.
- Collaborate with clients, their families, and other healthcare professionals to establish care plans, set goals, monitor progress, and adapt strategies to meet changing needs.
- Support residents in participating in activities, events, and social schemes to facilitate connections and build relationships with community resources, networks, and organisations.
- Implement procedures for coping with stress, anxiety, or other behavioural concerns.
- Assist with medication management by reminding individuals to take prescribed treatments, while ensuring compliance and documenting any side effects.
- Train patients on using assistive devices, as well as developing and improving their life skills, such as cooking, budgeting, and personal safety.
- Respond to emergency situations or crisis matters appropriately and promptly by following protocols to guarantee the well-being of adults and children.
- Maintain accurate and up-to-date records of services, incidents, and observations as required by supervisors or funding agencies.
- Advocate for clients' rights, needs, and preferences within the community and healthcare systems.

Key Achievements

- Integrated personalised care plans that elevated clients' ability to perform ADLs and manage daily tasks without constant assistance by 50%.
- Boosted satisfaction levels by 30% through improving the overall social engagement and community participation as a result of the support provided.
- Raised independence in medication management by 55%, while augmenting emotional regulation and life skills acquisition.

Outline

Helped persons who suffered from mental health, drug/alcohol abuse, or social issues that made it difficult for them to live independently, for an NPO that is recognised for substance use disorder treatments, transitional housing, and peer-assisted recovery.

Key Responsibilities

- Planned recreational activities, such as sports leagues and arts and crafts programmes.
- Guided individuals in obtaining correct government social welfare services.
- Coordinated resources to families necessary for enabling recovery, rehabilitation, and resiliency.
- Addressed comprehensive goals specifically in parenting and behaviour management.
- Accommodated members who were physically impaired live autonomously by assisting with feeding, bathing, grooming, and toileting.
- Distributed brochures and other materials to advertise events, while handling volunteer initiatives.
- Generated chore/laundry schedules for residents to complete tasks according to expectation.
- Upheld the safety of people and cultivated strong partnerships with the staff, parents, social workers, and psychologists through fostering engaging communication efforts.

Key Achievements

- Successfully intervened and de-escalated crisis situations, which led to a 25% decrease in the frequency and severity of incidents.
- Bolstered support efficiency by 45% due to demonstrating commitment and collaborating with team members concerning seamless transitions and better client outcomes.
- Solidified social connections for people, which led to a 70% increase in their participation in community activities, programs, and events.

Outline

Dispensed services for adults and children with intellectual/developmental disabilities and complex challenges, including autism spectrum disorders, for a provider of home and community-based specialty health care.

Key Responsibilities

- Functioned as part of the prevention assessment team to optimise quality of life, health, and wellbeing through early intervention and encouraging self-help.
- Carried out initial triage to determine presenting issues to identify the urgency of referrals.
- Supported people in recognising health improvement needs and accessing suitable care and services.
- Acted as a link between vulnerable individuals and relevant specialists to agree and execute actions that averted deterioration or crises.
- Prepared meals, and administered medication, and outlined a range of developmental objectives from community participation, exercise, and nutrition.

Key Achievements

- Formulated support plans tailored to clients' unique needs and goals, which improved client experience by 80% as evidenced by feedback and progress tracking.
- Received commendation for managing crisis situations, applying novel intervention techniques, and increasing people's safety/wellbeing in high-stress situations by 70%.
- Advanced the knowledge and confidence of caregivers in effectively supporting their loved ones by 50%+, through innovative family education seminars.

Education

- **Bachelor of Science in Human Services & Psychology** | University of Queensland
