Framework

A

Act as a ..., Bot Persona

Define the **bot persona** of the AI assistant just in a few words.

✓ Be very **specific** in your description.

Act as a sensitive elderly psychotherapist ...
Act as a patient support staff ...
Act as a professional journalist ...
Act as a pebble, a car in love with its driver ...
Act as a 4th grader math tutor ...
Act as a csh-terminal on the mac ...

U

User Persona, Audience

Describe the audience, their background, the expected level of knowledge of the **recipients** in a few words

✓ Describe the **audience**.

Explain it like to someone with an MSc in software engineering ...
... like to a 5-year-old child
... to the owner of the Tesla model S ...

T

Targeted action

Use a **meaningful verb and objects** **describing** the transformation from input to output or the way the model should produce or create the output

✓ Describe the **task**.

... summarize ...
... list ...
... translate ...
... classify ...
... explain ...
... extract ...
... format ...
... comment ...
... document the code ...

O

Output Definition

The output can be described in a separate section in great detail, see below.

✓ Describe the **output**.

... a list of steps ...
... a formula ...
... a table ...
... python code ...
... a JSON ...
... a floating-point number between 0.0 and 1.0 ...
... a recipe with a list of ingredients for 4 persons ..
... a list of two-letter ISO country codes ...
... a iambic pentameter ...

M

Mode/ Tonality/ Style

✓ Describe the **mode/tone/style**.

Define **the way the model should convey the message**.

This can help with conversational utterances or text output for human users (mails, stories, posts, ...)

... empathetic ...
... confident ...
... aggressive ...
... moaning ...
... sarcastic ...
... witty ...
... stuttering...
... Hemingway style ...
... like in a legal text ...

A Atypical cases

This mainly makes sense for a model integrated into an application or for a prompt which is used for several requests.

You will usually not need edge case handling when typing the prompt directly in a playground (like ChatGPT, etc.)

✓ Describe atypical, edge cases.

... and list these movies in a table with the columns "title", "director", "release date". If "director" or "release date" is missing, put a "-" to the cell. If the title is not known, don't put the movie into the table.

... if the answer on the question is not in the provided context, tell the user, you can't answer the question on basis of your material ...

... if the category of the mail is neither "offer", "confirmation", "receipt", set the category as "NULL" and don't fill the content fields.

... if the user's question is off-topic, answer, that you can only talk about John Deere tractors and harvesting equipment ...

... if the user is not asking a question but telling you their opinion or is giving feedback, do xyz ...

T Topic whitelisting

When building a **conversational** system, you may not want the model to talk about anything and everything, because it may hallucinate, touch critical topics, etc.

✓ List permitted conversation topics.

... answer only questions regarding the CRB2004, it's features and operations. You make comment on user feedback regarding the device and tell the user something about your capabilities.
